- Street Puppy Adoption drives: Radio Active will conduct regular adoption drives to encourage residents own a community dog
- Pet Therapy: Radio Active frequently conducts Pet Therapy program for Senior Citizens.

Tracing Junkie (Mongrel) - A Campaign to instil accountability from NGOs working on ABC program in Bangalore city

Every year, hundreds of street dogs go missing from the area of their birth; but who is counting?

Should there be an individual or family who cares for the dogs, then the burden of locating them rests on those individuals, who in most cases are either grieving or disheartened to seriously come together to voice out their concerns or ask for help to find their beloved dog.

“Tracing Junkie Campaign” is a result of those many street dogs that have been lost to oblivion due to poor management of records, handling or just carelessness during ABC programs. Numerous times we see that a BBMP or NGO vehicle comes to an area, picks up as many dogs as possible and are never returned. These vehicles also pick up dogs en-route to their designated area and don't bother to drop them back to the same area. God alone knows what happens to them!

Compassionate Kids

A humane education program bringing together teachers, animal lovers, community members, school children to promote empathetic behaviour towards street animals and act as children ambassadors.

This program is targeted at School Children – aged 10 to 16 years around BBMP limits. A special manual has been designed by Pinky Chandran and Marwan Abubaker with inputs from Shamalatha Rao.

This program will run in Phases of six months and a evaluation will be conducted at the end of the six months. The results will be made available on the website
